SKILLS

React (Hooks, React Router)
Redux / Redux Toolkit
JavaScript (ES6)
TypeScript
RESTful API / Axios
HTML / HTML5
CSS / SCSS
GIT / GitHub
i18next
Leaflet Map / ChartJS / Swiper
Figma / Pixso / VS Code
Intersection Observer API
Adaptive and cross-browser layouts

LANGUAGES

English – Pre-Intermediate (A2), able to read documentation

Ukraine – native

Russian – native

EDUCATION

UNIVERSITY OF STATE FISCAL SERVICE OF UKRAINE

Information control systems and technologies

Bachelor's Degree | 2017 - 2021

STATE TAX UNIVERSITY

Information control systems and technologies

Master's Degree | 2021 - 2023

PROFILE

- Front-end Developer focused on building interactive and scalable web applications using React, Redux, TypeScript, and modern JavaScript.
- Experience in developing SPA applications, working with REST APIs, complex UI logic, and performance optimization. Strong attention to UX and responsive design.
- Continuously improving skills and exploring new technologies.

PROJECT EXPERIENCE

— Shenya Anime —

SPA application for searching and browsing anime, manga, and characters. Built as an interactive catalog with advanced filtering, dynamic routing, and efficient data fetching.

- Implemented nested and dynamic routing
- Integrated REST API with rate-limit handling and request cancellation
- Built filtering & sorting with URL state synchronization
- Optimized data fetching and prevented redundant requests
- Enhanced UX with skeleton loaders and lazy-loaded media

Tech Stack: React / Redux / TypeScript / React Router / Axios / Jikan API / LightGallery / Swiper / ChartJS / Intersection Observer API / SCSS

GitHub: https://github.com/DerLiewert/shenya-anime

Live Demo: https://derliewert.github.io/shenya-anime

— Obogrev Lux —

Frontend e-commerce website with multi-page structure, focused on UI architecture, UX patterns, and performance optimization.

- Developed a responsive header with multi-level navigation and scroll behavior
- Optimized performance with lazy-loaded sliders and deferred media loading
- Engineered a custom image zoom interaction system with separate desktop and mobile behaviors, including synchronized preview rendering, dynamic scaling, boundary constraints, and drag-based image movement.

Tech Stack: JavaScript / HTML / SCSS / Swiper / YouTube Data API

GitHub: https://github.com/DerLiewert/obogrev-lux

Live Demo: https://derliewert.github.io/obogrev-lux

— Personal Portfolio —

Personal front-end developer portfolio SPA built with React and TypeScript, showcasing projects, technical solutions, and interactive UX.

- Built light/dark theme switching with automatic system preference detection
- Added multilingual support (English, Ukrainian, Russian) with instant content update
- Integrated contact form via EmailJS and optimized project/media loading
- Developed reusable components, hooks, and dedicated project pages
- Implemented SPA navigation with smooth scrolling and active section highlighting

Tech Stack: React / TypeScript / React Router / Context API / EmailJS / i18next / Swiper / Intersection Observer API / SCSS

GitHub: https://github.com/DerLiewert/portfolio

Live Demo: https://derliewert.github.io/portfolio

— RETON —

Interactive landing page with scroll-driven animations and dynamic UI components.

- Implemented scroll-based animations using GSAP + ScrollTrigger
- Built interactive UI elements (timeline, tooltips, accordion, toggles)
- Developed custom slider and dynamic UI behavior
- Adapted complex components for different devices
- Optimized performance by disabling heavy animations and unnecessary logic on mobile devices

Tech Stack: JavaScript / GSAP / ScrollTrigger / Swiper / HTML / SCSS

GitHub: https://github.com/DerLiewert/reton

Live Demo: https://derliewert.github.io/reton

— Bank Hotel —

Responsive landing page for a premium hotel, focused on interactive UI, booking flow, and scroll-based animations.

- Built a custom booking calendar (check-in / check-out logic)
- Developed booking modal with state persistence
- Implemented scroll-based animations and parallax effects
- Built interactive UI components (accordion, slider, modal)

Tech Stack: JavaScript / Swiper / Intersection Observer API / Animation / HTML / SCSS

GitHub: https://github.com/DerLiewert/bank-hotel

Live Demo: https://derliewert.github.io/bank-hotel
